Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
3. Claim 1 and 3 disclose a "proper location". It is unclear the scope of the term.
4. Claim 4 recites the limitation "said serrated structure" in line 3 of the claim.

There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Godfrey (U. S. Patent no. 910,123).

Godfrey discloses:

Art Unit: 3683

See figures wheel body (wheels 3, rectangular shaped box frame body 1,16 with multiple screw holes on top, shaft 2) switch top-board with serrated bottom 13, top-board 18, braking block 14

Regarding claim 1, Godfrey does not disclose a rectangular braking block. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have a rectangular braking block as the shape is merely a design choice.

Regarding claims 2 and 3, Godfrey does not disclose forming the frame body and the switch top-board from metal plate. It would have been obvious to one of ordinary skill in the art at the time the invention was made to form the frame body and the switch top-board from metal plate as such a method of construction is well known, lightweight, cheap to manufacture, and strong.

Regarding claim 4, Godfrey does not disclose a spring to damp movement by the switch top-board clamped in the serrated structure. Godfrey does disclose a spring 17 to damp the movement by the switch top-board. It would have been obvious to one of ordinary skill in the art at the time the invention was made to place the spring clamped in the serrated structure in such a way to damp the movement of the switch top-board as such is merely a design choice.
